The automotive industry has responded to this shift by investing heavily in EV technology. Major car manufacturers such as Tesla, Ford, and Volkswagen have already made significant strides in EV development, with plans to introduce more models to their lineup in the coming years. Other manufacturers, including General Motors and Nissan, have announced plans to phase out internal combustion engines and shift to all-electric vehicles.

This shift to electric vehicles is not just driven by environmental concerns, but also by economic factors. The cost of EVs has been declining
